

## Sowing the SEEDS of Resilience: India Flood Response 2023

The devastating impact of recent floods in India have caused immense destruction, uprooting thousands of families, claiming lives and disrupting the existence of countless individuals, leaving nearly half a million affected by the disaster in several states such as, Delhi, Himachal Pradesh, Uttarakhand and Assam.

SEEDS ground team and partners have already started reaching out to marginalised families in the impacted states with essential supplies. We are committed to assist at least 10 lakh most-affected people in the flood-hit areas & for that,
